

Electronic Services

Wabtec Global Services (WGS) offers the finest in component level electronic repair and addresses the needs of today's mobile workforce through our broad array of wireless service capabilities.

• REPAIR • ON-SITE SUPPORT • WIRELESS SERVICES •

ELECTRONIC REPAIR

WGS offers a variety of programs to satisfy customer needs including standard repair and return, unit exchange and the outright sale of electronic equipment that meets OEM standards. We repair, renew and upgrade Wabtec products as well as:

- Wabtec acquisition product lines including Pulse Electronics, Rockwell Railway Electronics, TSM, and Q-Tron
- Handheld wireless equipment
- Consumer and industrial goods
- Motorola & Harmon radios

Qualifications

FCC licensed, our electronic technicians follow proper ESD precautions and practices

that meet industry standard, ANSI/ESD S20.20.

In addition, our technicians continuously attend training with OEM's and technical schools to stay on the forefront of today's technology.

Our highly skilled repair technicians possess a variety of qualifications including:

- *Troubleshooting down to the component level*
- *The use of state of the art electronic test measuring equipment*
- *Diagnosis and analysis of product failure modes*
- *Interpretation of source codes (C++, Cobol, Job Control Language)*
- *Computer programming*
- *Microprocessor technology*
- *Analog and digital circuitry*
- *RF (Radio Frequency)*
- *Interpretation of schematics and blue prints*

ON-SITE SUPPORT

Available to provide on-site engineering support, our highly skilled technicians assist customers with problem repairs, the procurement of equipment, test procedures, rework instructions, training and software upgrades. In addition, our on-site support team drives our ability to manufacture and design test equipment to meet customer requirements.

WIRELESS SERVICES

WGS' wireless solutions help to eliminate inefficiencies and reduce costs through the rapid deployment of critical communications infrastructure. We uniquely match customer requirements to the latest technologies without manufacturer bias to ensure total customer success.
